November 13, 2011

1 Introduction

This is an example of calling python code through Pweave.

```
from pylab import *
from pandas import *

print DataFrame(range(10))
```

	0
0	0
1	1
2	2
3	3
4	4
5	5
6	6
7	7
8	8
9	9

This document can be built by calling "pweave -f tex python_finance.Plw", followed by "python_finance.tex"..
